The pilot station network for the DXpedition includes WB9Z (Chief and North American pilot), EA3AKP (Western and Southern Europe), G3XTT (Western Europe), IK0FVC (Southern Europe), JJ3PRT (Japan), NP4G (South America and Caribbean), OG2M (Northern Europe), R7LV (Eastern Europe), ZL3IO (Oceania), ZS1C (Africa) and W7GJ (EME Pilot). Please go to the website's "Pilots and Off-Island Team Members" page for the details. The pilot plan is somewhat 'Eurocentric', because needs for a VP6 contact are greater in Europe, EU signals may be 'under' stronger signals from other geographical areas, and Europe faces more substantial propagation challenges which differ among the various parts of the continent.
